PRO SERIES

UNFINISHED SOLID FLOORING

Customizable unfinished solid flooring designed for the professional hardwood flooring installer.

No other choice provides the warmth, beauty, and value of hardwood flooring. Multiple hardwood species and their various grades define the look and feel of a home or office interior design. Applying finishes and stain can accentuate or modulate the characteristics of the wood's natural beauty to further increase the design options available. Our Pro Series of unfinished solid hardwood flooring is designed for the professional installer who can take this raw flooring product, and finish it to their customer's custom design wishes. We carry a full line of installation tools, sealers and finishes; everything to complete a Pro Series Unfinished Solid Hardwood Floor.

RED OAK

Features a tight grain and the most consistent warm color compared to other species. Its neutral color allows for a variety of applied stains and styles to compliment the home. Northern Red Oak is one of the most popular hardwood flooring options for both home and office.

- 3/4" x 3-1/8"
- 3/4" x 3-1/4"

JANKA SCALE

The Janka hardness test measures the resistance of a sample of wood to denting and wear. It measures the force required to embed an 11.28 millimeter diameter steel ball halfway into a sample of wood. Commonly used to determine whether a species is suitable for use as flooring. The higher the Janka number, the more resistant the wood is to denting and wear.
